2. Learning in school

Biology drives you crazy but you
Stay pretty cool. The teacher thinks you're lazy
But the body you read about, cells and amalgam
Is the same one that you take to the exam

Chorus: Connected to the brain ...

3. Falling in love

It seems your brain's on vacation when your
Knees start to knock. Red cheeks inform the nation
What no rhyme or reason or logic can prove
But the brain will get you into the groove

Chorus: Connected to the brain ...

4. Tonic with gin

Maybe nothing's grooving but inside of your skin
Things are getting moving
Water and oxygen, sugars and more
Through your blood, yeah, that's what it's for

Chorus: Connected to the brain ...

5. Singing with you

My toes are almost dancing and my
Fingers are too. The beat is so entrancing
But don't let the music run away with your soul
'Cause the brain likes control of it all

Chorus: Connected to the brain ...
